High School

Online + Blended Learning Solutions for Students in Grades 9–12

Edgenuity®

Rigorous Solutions that Ensure Students are College and Career Ready

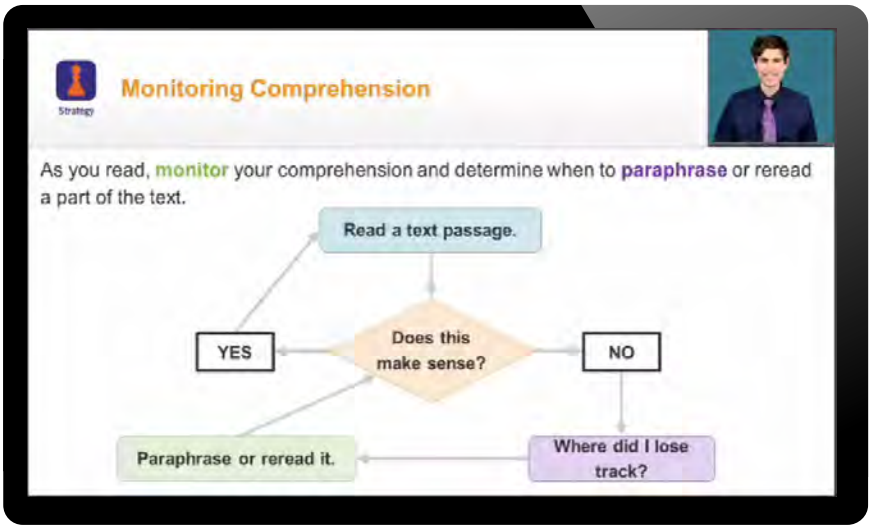
The path to graduation does not look the same for every high school student. That's why Edgenuity's online solutions can help students close learning gaps, recover credits, and meet graduation requirements. Our courses can also help advanced students explore career interests, and pursue Advanced Placement ® options.

Regardless of the path students take, Edgenuity can help to engage and motivate students, as they prepare for future success.

Online Curriculum

Provide opportunities for initial credit or credit recovery.

Edgenuity Courseware™ for ELA, math, science, social studies, world languages, Advanced Placement, CTE, and electives are designed to help students meet the rigor of Common Core and state standards and ensure subject-area mastery.



- **DIRECT INSTRUCTION VIDEOS:** Expert on-screen teachers provide instruction, model strategic thinking, and make real-world connections.
- **INTERACTIVE TASKS AND ASSIGNMENTS**: Students read, write, explore, create, practice, predict, and more in order to develop analytical and critical-thinking skills.
- **FORMATIVE AND SUMMATIVE ASSESSMENTS:** A variety of assessments test for mastery and provide immediate, actionable feedback for students and teachers.
- **INTERACTIVE LEARNING TOOLS:** A full suite of learning tools and scaffolds, including read aloud and text translation, help students access content, organize information, and complete assignments.

Course Customization

Powerful Tools to Differentiate Instruction.

Edgenuity's course customization tool helps educators easily reorder, remove, and add content to align courses to your school's or district's scope and sequence. Add your own activities or create modules for grade improvement, remediation, or competency-based learning to personalize courses for your students.

Our LMS also enables teachers to customize assessment settings for test time completion, passing threshold, and grade weights, as well as course settings for read aloud, translation, and other supports. These settings help accommodate students with a variety of needs, including English language learners and those with disabilities.

Real-Time Data

A Big Picture View of Program Success.

Real-time reports in Edgenuity's LMS show student, school, and district performance, so administrators can see a big picture view of program success and teachers can focus on their students' specific needs.

- **SINGLE-STUDENT REPORTS** show teachers how students performed on lessons, units, and activities. Session logs, progress reports and assignment calendars provide detailed data on individual student performance.
- **GROUP REPORTS** show data for multiple students to inform offline instruction. For example, the Lesson Mastery Report gives educators a customizable view of data on student and class progress.
- **ADMINISTRATORS** can see data for all of their students using the school and district reports. Available reports include the Recent Action Log, Active Enrollment by Grade Level, and Total Enrollment by Course.

Targeted Intervention

Help students catch up, keep up, or get ahead.

MyPath™ is an online intervention program that offers data-driven differentiated instruction for math and reading. Age-appropriate instruction spans skills in grades 3–11 so high school students can close learning gaps, even at the foundational level.

- **ASSESS STUDENTS:** A placement exam determines the best instructional path for each student. Or, schools can import scores from NWEA™ MAP® Growth™, Renaissance Star 360®, and Scantron® Performance Series® assessments to develop recommendations based on data you already have.
- **PERSONALIZED INSTRUCTION:** Based on the assessment data, the system automatically recommends an Individualized Learning Path that focuses on the skills and concepts each student is ready to learn.
- **MONITOR PROGRESS:** Detailed and dynamic reports provide educators with the tools to identify topics that are challenging for students and create flexible groups for reteaching.

Test Preparation

Ensure every student can be successful on state and national exams.

Edgenuity Virtual Tutors courses offer comprehensive preparation for end-of-course and exit exams, as well as the SAT®, ACT®, PSAT®, GED®, HiSET®, and TASC®.

- **UPFRONT DIAGNOSTIC:** Pretests assess students' strengths and weaknesses, creating an individualized content review program. Students only receive instruction and practice on skills they have yet to master.
- **DIRECT INSTRUCTION:** Virtual Tutors provide more than just practice. Expert, on-screen teachers guide students through the content, modeling strategic thinking, problem solving, and more.
- **FREQUENT ASSESSMENTS:** Students receive data to help monitor their own understanding and stay on track. Teachers also receive ongoing data to monitor students' progress and performance.

Student Athletes

Ensure your student athletes are college ready.

Edgenuity's curriculum and instructional model have been approved for online instruction by the NCAA. Edgenuity Instructional Services provides courses directly to student athletes using our own highly qualified, state-certified virtual instructors. Edgenuity's teachers provide synchronous instruction via chat, phone, and web meetings. They also provide written feedback on students' work, reteach concepts, and communicate regularly with school staff and parents. *Edgenuity's approved curriculum can be used with district teachers; your school or district must contact the NCAA Eligibility Center to submit a Non-Traditional Course Questionnaire to describe your implementation model.*

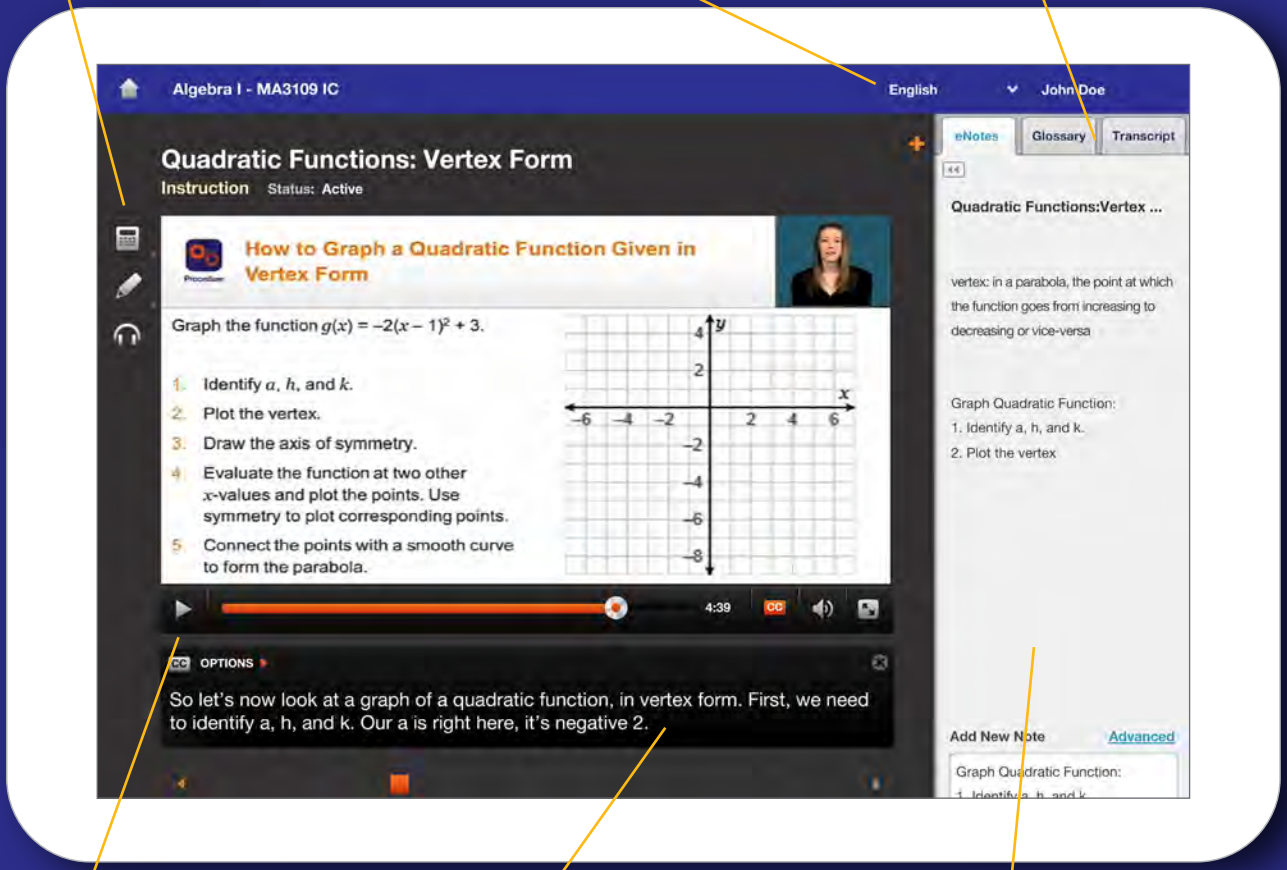
Support for All Students

Embedded supports and scaffolds ensure that all students, including English language learners and students with special needs, meet the challenges of the standards.

TOOLBAR
A robust toolbar provides highlighting, text annotation, read aloud, and lesson-specific tools.

TRANSLATIONS
Students can translate on-screen text into their home language.

GLOSSARY + TRANSCRIPT
Students can access a lesson glossary and a complete lesson transcript.



VIDEO
Students can pause and rewind any video to hear challenging concepts explained again.

CAPTIONS
Students can view simultaneous captions for all lessons.

DIGITAL NOTEBOOK
Students can take notes as they learn, encouraging active learning and providing a record teachers can review in real time.
